

# Release notes for openPEPPOL Validation Artifact v3.3.0\_RC1, Fall Release 2016

openPEPPOL AISBL

2016-09-21

This release from openPEPPOL includes changes to the validation artifacts (VA's), changes to the Common BIS document, and the removal of support for BIS 1.0 versions. This version will be **mandatory in use from 15. November 2016 12:00 CEST**.

### Overview of changes

1. Several validation rules have been optimized according to incoming RFCs
2. Added ID attribute to code list rules
3. Added chapter in Common BIS for validation principles.
4. Editorial updates BIS 1a (Catalogue)

**The support for PEPPOL BIS version 1.0 will be deprecated as of the spring release 2017.**

Planned date for the spring release is 15. May 2017

As previously announced the ODS files are not provided, as the Schematron files are considered the authoritative source for the Validation artefacts.
